No comments had been received back regarding the details that were circulated for approval. They will be ready to register the plan once those matters are completed. II. Several complaints to the Information Commissioner had been made and several others were being prepared. A major complaint had been sent to the external auditor about this year's accounts and financial declarations. 1342/07/26	Freedom of Information Requests The Clerk reported that she had three FOI requests open. These were again from the same small group of individuals that had submitted them previously. One had been refused under section 12, but was now under review. The second had been responded to request clarification. The third was still ongoing and quite recent. Clerk to proceed as required. The Information officer from Cumberland Council was also reviewing a FOI request that they had received. Councillors considered the nature of a document and the circumstances under which it had been shared with Cumberland Council's Monitoring Officer team, and felt that it would be a serious breach of trust if that was released by them.	JO JO																								
1343/07/26	Subject Access Requests The Clerk reported that she had one subject access request currently live. She had already informed the requestors that additional time would be required due to how broad the request was.	JO																								

	She would attempt to provide the requested information, however as the request did not just refer to the subjects by name, but also indirect references, it was quite onerous. If the request proved to be too difficult, then the Clerk would offer to supply only information that named the subjects, if this was declined, then the request may have to be refused as excessive.
